

main.c

Run ▶

```
1  #include <stdio.h>
2  #include <string.h>
3
4  int main()
5  {
6      char com[100];
7      int i, a = 0;
8
9      printf("\nEnter comment: ");
10     fgets(com, sizeof(com), stdin);
11
12     if (com[0] == '/')
13     {
14         if (com[1] == '/')
15         {
16             printf("\nIt is a comment");
17         }
18         else if (com[1] == '*')
19         {
20             for (i = 2; i < strlen(com) - 1; i++)
21             {
22                 if (com[i] == '*' && com[i + 1] == '/')
```

Output

Enter comment: //hello

It is a comment

```
23 {  
24     printf("\nIt is a comment");  
25     a = 1;  
26     break;  
27 }  
28 }  
29  
30 if (a == 0)  
31     printf("\nIt is not a comment");  
32 }  
33 else  
34 {  
35     printf("\nIt is not a comment");  
36 }  
37 }  
38 else  
39 {  
40     printf("\nIt is not a comment");  
41 }  
42  
43 return 0;  
44 }
```

Enter comment: //hello

It is a comment
